OBJECTIVE

Computer engineering student seeking a summer 2027 internship in embedded systems development. Eager to leverage programming expertise and hands-on hardware fabrication experience to design and optimize integrated systems that bridge software and hardware for real-world applications.

EDUCATION

Georgia Institute of Technology <i>Bachelor of Science in Computer Engineering, Minor in Computing and Intelligence</i> <i>Cumulative GPA: 4.0/4.0</i>	Atlanta, GA <i>Expected May 2028</i>
Fairfax High School <i>Advanced Studies Diploma Cumulative GPA: 4.6/4.0</i> <i>Honors: National Merit Commended Scholar · AP Scholar with Honor · Service Award for Leadership</i>	Fairfax, VA <i>2025</i>

EXPERIENCE

Research Assistant <i>The Thomas Jefferson National Accelerator Facility</i> - Selected as 1 of 11 students to collaborate directly with an injector scientist on the particle accelerator beamline - Designed, fabricated, and installed 3D-printed mounts for four corrector magnets on the UITF, achieving micron-level alignment and precise field control - Modeled magnetic fields in CST to optimize magnet placement and ensure alignment within accelerator specifications - Authored an internal LaTeX technical report and presented findings at a laboratory symposium, informing ongoing accelerator operations and design decisions.	2024 Norfolk, VA
--	---------------------

PROJECTS

Blockchain Mining Rig & Sustainability Analysis <i>Ethereum, GPU Mining, Energy Efficiency</i> - Built a high-performance Ethereum mining rig with optimized GPU configuration, cooling system, and power efficiency, achieving 700+ MH/s and mining 5 ETH (peak value \$24,000) - Researched environmental impacts of cryptocurrency mining, analyzing energy consumption, cooling requirements, and sustainability trade-offs - Designed strategies to balance mining performance with energy efficiency, considering real-world power usage and carbon footprint	2020 – 2025
--	-------------

LEADERSHIP

Science Olympiad <i>President</i> - Led 100+ students across 23 STEM events, fostering engagement and hands-on learning opportunities - Doubled club membership by implementing targeted outreach initiatives and developing new STEM resources - Guided the team to 3rd place at the statewide competition in both 2023 and 2024 - Earned individual awards: 1st place (2024) and 2nd place (2023) at statewide robotics competitions	2022 – 2025
Computer Science Honor Society <i>Vice-President</i> - Directed 100+ student meetings covering emerging computer science topics - Coordinated projects, invited guest speakers, and organized service events	2021 – 2025
AA Ice Hockey <i>Captain</i> - Mentored the team on/off the ice, culminating in multiple national tournament victories - Designed practice/game plans with players and coaches, fostering team camaraderie	2018 – 2024

TECHNICAL SKILLS

Languages: Java, Python, C/C++, HTML/CSS, Swift, LaTeX
Design: Autodesk Fusion 360, CST Studio, Suite CNC Machining, 3D Printing
Clubs: Science Olympiad @ GT, HyTech, Silicon Jackets, iOS Club
